

# Chatham Farms 2395 Gibbs Road Goshen OH 45122

## Problem

In the show ring the area circled in yellow has standing water and or saturated water for about 1 to 2 weeks following a “good “rainfall while the rest of the ring driesout in a day or 2. The owners do not use the show rings for events but rather just training . As long as the problem area of the ring can dry out within 2 days of a “good rain” then they will be very satisfied.
