

31705 E Bellvine Satellite Shot from 2007

This part of the home is not shown in the EGRP Layout and will directly interfere with rows A & B in the layout. Also there I am told there is a patio or deck between this portion of the home and the garage. I am leaving now to get visual confirmation of the patio and to look for the sewer and water line. It is very helpful when there are trees to use the timeline function to get earlier shots or to use Bing Maps Bird's Eye view. Of course visual confirmation is the best. -Rich
