Statement of Problem:

The problem at this site is on the northwest side of the condominium buildings. On the northwest side of the buildings the ground becomes saturated and sand standing water sits for 5-10 days after a heavy rain. After a heavy rainfall some of the standing water can flow into the north corner entrance into the building west to the newly paved asphalt.

Quotation:

Engineering Notes:

The goal of an installation on this site is to remove standing water and heavily saturated soils within 48 hours and to reduce the incidents where water is entering the building. The installation would occur directly over the problem areas. The installation would require 40' EGRP.
