Customer	Michael Brieda
Job Address	216 Ford Blvd
City, State, Zip	Windsor, Canada N8S2E5
Phone	519-948-7420
E-mail	mnbrieda@cogeco.ca

Primary Objective

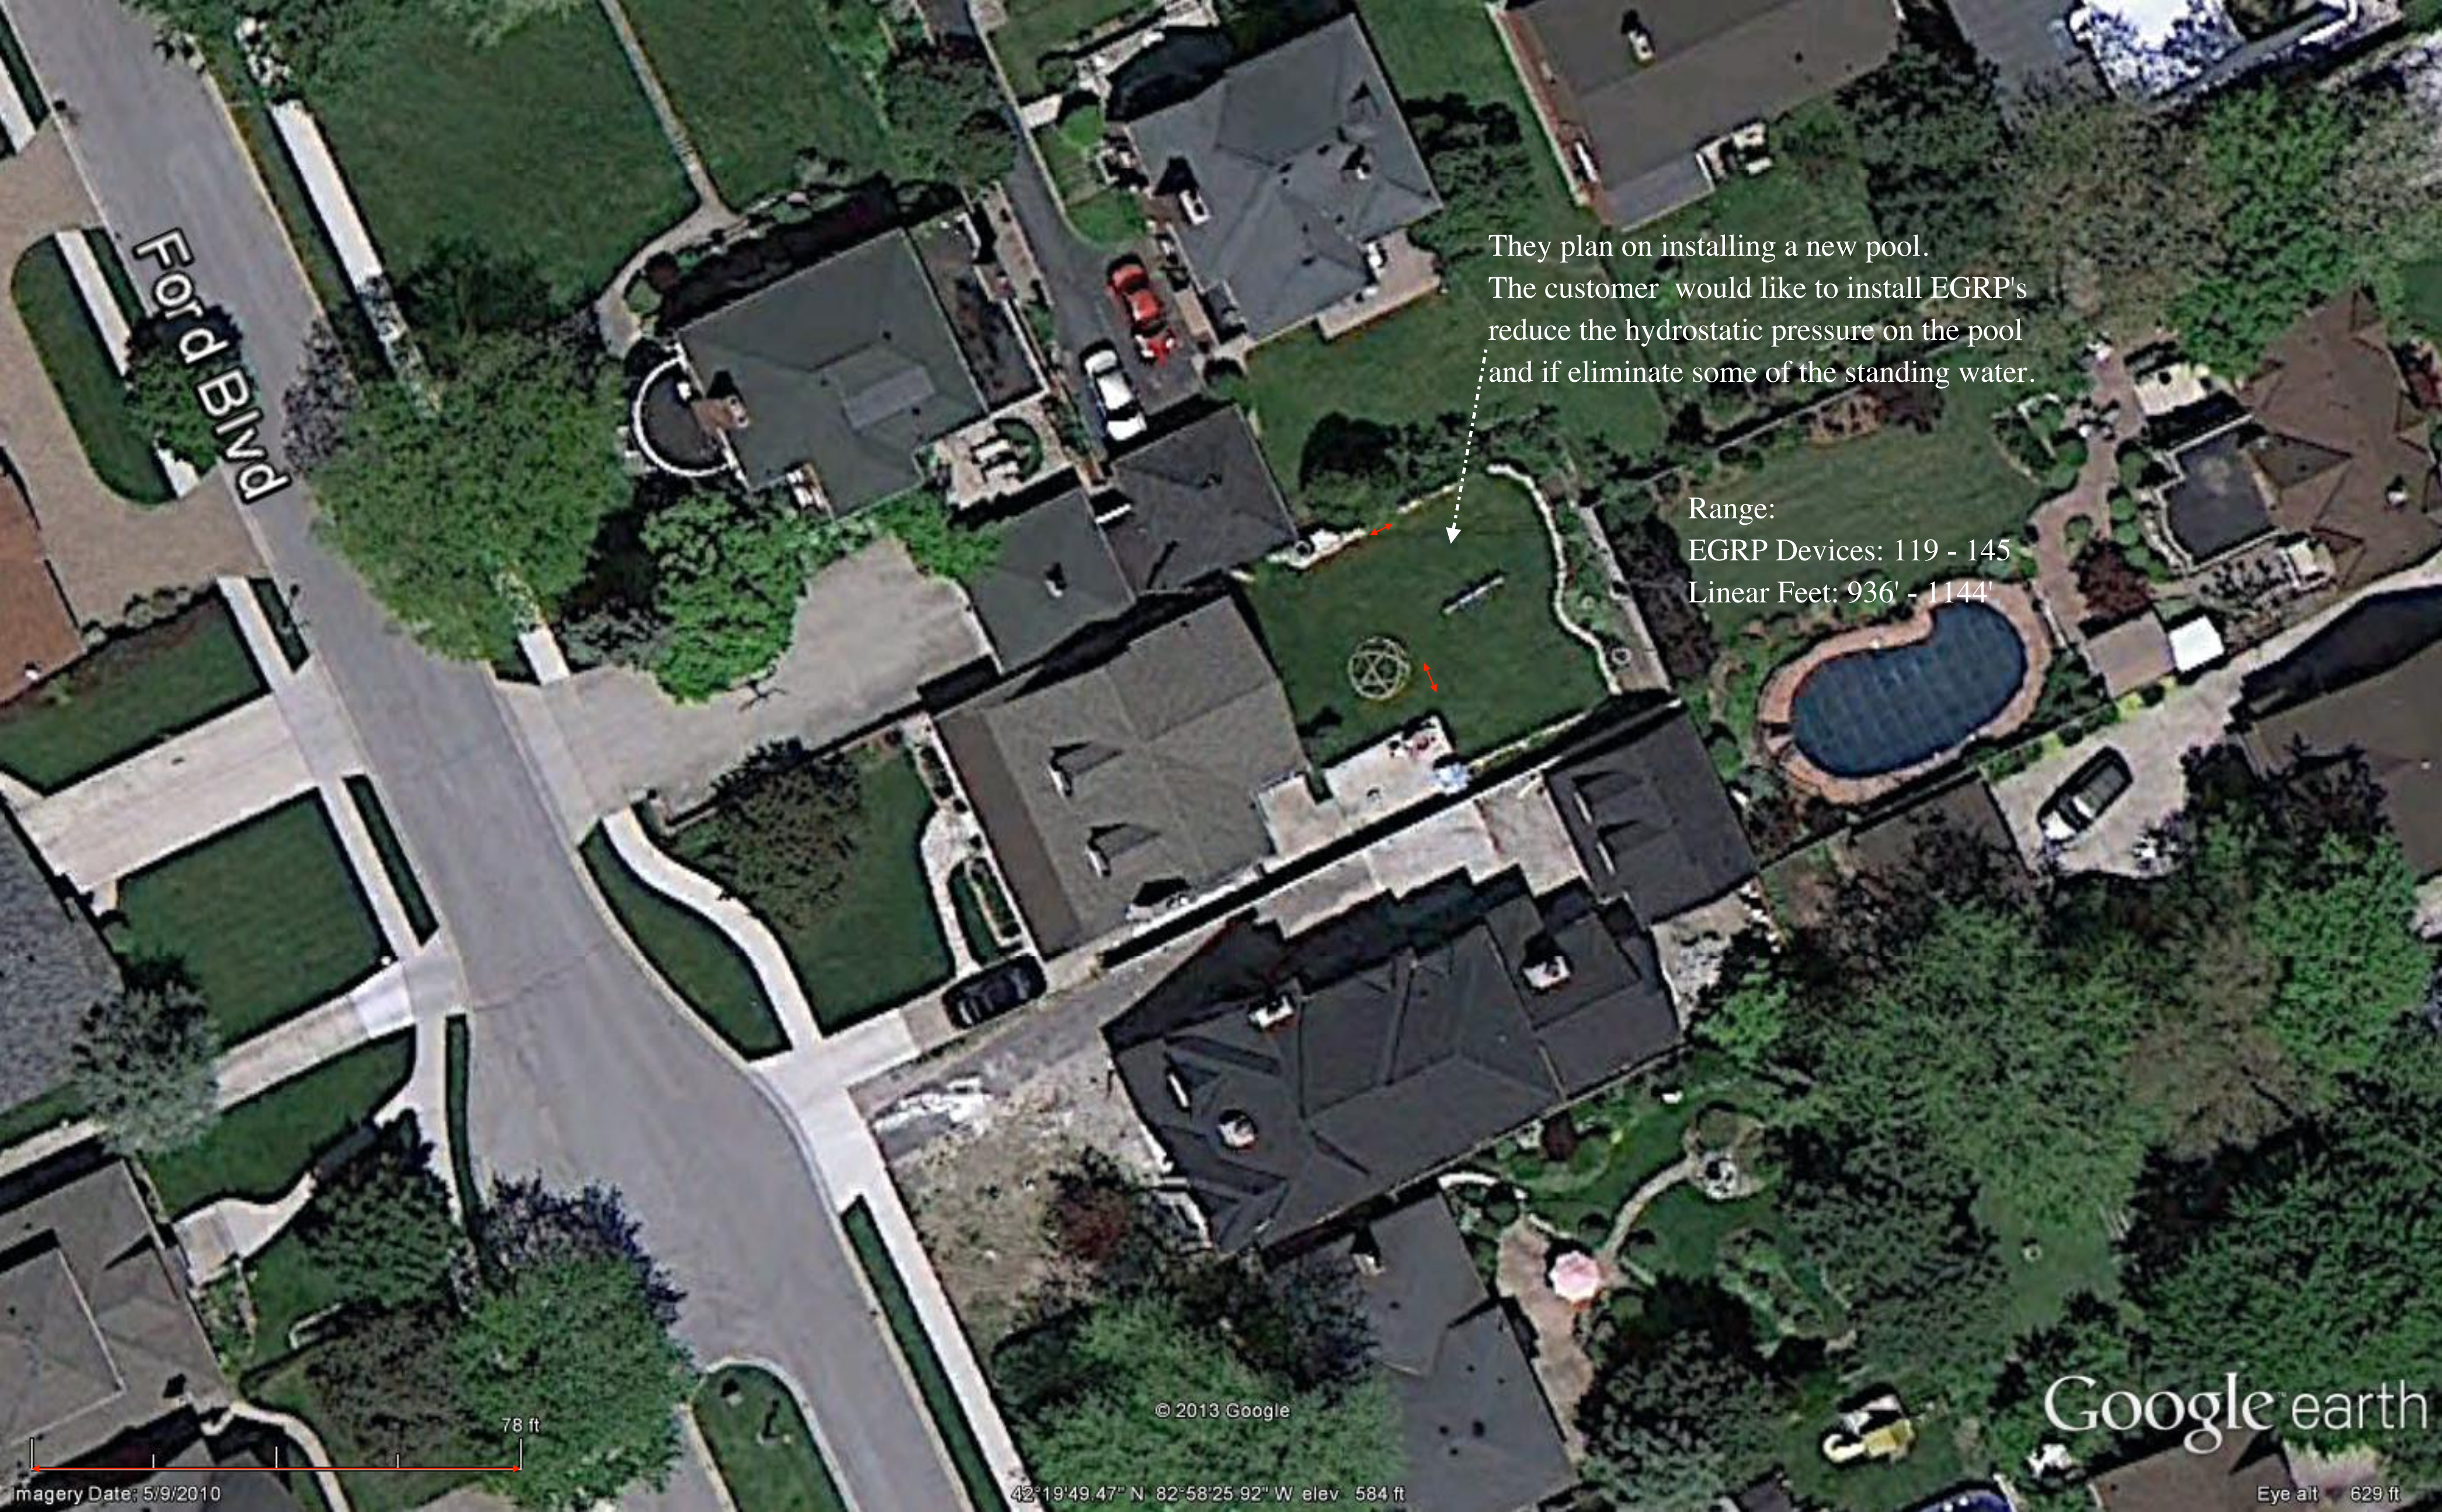

The primary objective of the proposed EGRP® system to reduce hydrostatic pressure on the pool and if eliminate some of the standing water.

Other Benefits

1. Sanding water will be eliminated in a shorter period of time following rain events.
2. No maintenance of Parjana EGRP® system is needed.
3. Will work with existing drainage system to improve it's performance while reducing maintenance.
4. Parjana EGRP system is designed to last well over 50 years and guaranteed for 25 years.
5. Works in all soil types (A, B, C, D)

Estimated Cost

Water site analysis : includes evaluation for water problem and engineering	\$250
Range for Installation including labor and material	\$8,611/\$10,524

They plan on installing a new pool.
The customer would like to install EGRP's
reduce the hydrostatic pressure on the pool
and if eliminate some of the standing water.
