

Trellises Apartments, Florence Ohio

Water issues as further described by Nate:

1. Water is getting into the corner unit on the left building
2. Water is sitting for a period of time at the base of the hill on the left
3. Water pools for a longer time behind building on right, but does not enter the building
4. Entire area remains wet for days after a major rain

Objectives

1. No water entering structure
2. Remove standing water in reasonable amount of time
3. Remove soginess in area in reasonable amount of time
