Statement of Problem:

Client is experiencing drainage issues in the left outfield. They are also experiencing washout in the right infield behind first base.

Quotation:

Engineering Notes:

Upon analysis the water is naturally discharging to the West; however, due to elevation changes and impervious infrastructure such as roads and homes, water is unable to infiltrate causing it to be trapped in the problem areas. The problem areas need the suggested range of EGRPs to reconnect water with the underground flow diminishing water accumulation.
